DATE MAILED: 02/04/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	10/623,309	MILLER, DAVID JEFFREY	
	Examiner	Art Unit	
	Brian R. Gordon	1743	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 18 July 2003.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1,2 and 6-8 is/are rejected.
- 7) Claim(s) 3-5 is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on 18 July 2003 is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) <input checked="" type="checkbox"/> Notice of References Cited (PTO-892)	4) <input type="checkbox"/> Interview Summary (PTO-413)
2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)	Paper No(s)/Mail Date. _____
3) <input checked="" type="checkbox"/> Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date <u>12-22-03</u> .	5) <input type="checkbox"/> Notice of Informal Patent Application (PTO-152)
	6) <input type="checkbox"/> Other: _____.

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: Serial number for the co-pending application mentioned on pages 7-8 is missing.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 2, and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 1 recites the limitations "the assay" and "the specifically defined tip period" in lines 3 and 5, respectively. There is insufficient antecedent basis for these limitations in the claim.

5. Claim 2 recites the limitations "the calibration and control procedure" and "the specifically defined time period" in lines 3 and 6, respectively. There is insufficient antecedent basis for this limitation in the claim.

6. Claim 8 recites the limitation "wherein analyzing the demand pattern includes" in

1. There is insufficient antecedent basis for this limitation in the claim. Claim 1 does not mention an analyzing step. Claim 1 should be amended to incorporate such a step or claim amended to recite "the method of claim 1, further comprising analyzing..."

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

9. Claims 1-2, 6, and 7 rejected under 35 U.S.C. 103(a) as being unpatentable over Balisky US 6,521,112.

Balisky discloses a device and method for controlling the content of a chemical bath (abstract).

In a first aspect thereof, is in the form of a method of controlling the content of a chemical bath. This method aspect of the invention includes the steps of: first determining a rate of continued replenishment of a predetermined constituent of the chemical bath; second determining a replenishment condition for the chemical bath; and adjusting the rate of continued replenishment of the predetermined constituent of the chemical bath in response to the replenishment condition.

The rate of continued replenishment in the step of first determining is based on an historical replenishment rate. The step of second determining a replenishment condition includes, in one embodiment of the invention, the step of monitoring elapsed time. In other embodiments, the step of second determining a replenishment condition. (column 1, lines 47-64)

The replenisher aspect of the invention is a combination of software, computer/controller hardware, and chemical dispensing hardware that is able simultaneously to: Receive commands and send responses or status to a host computer. Receive commands and send responses or status to a user keypad and display terminal. Start, monitor, and stop multiple chemical deliveries independently to multiple destinations.

Some of the parameters monitored or tracked by the system are: Chemical flow rate Chemical usage , cumulative Chemical supply status (OK, low, empty) Pump status (on, off, disabled) Pump calibration factors (calibration and control features). (column 2, line 63 – column 3 line 12)

Replenishment of a chemical bath proceeds at a predetermined rate that may be based on historical experience with the particular operating bath. Alternatively, the existing replenishment rate in effect in a given system may be predetermined based on experience with similar or related chemical systems.

When an analysis result is obtained, the change in analytical reading since the last analysis is calculated. If result averaging is in effect, this same equation applies but

Art Unit: 1743

the Current Reading is replaced with the average of the current and previous n readings and the Previous Reading is replaced with the average of the previous reading and its corresponding previous n readings.

Balisky does not disclose the n previous readings averaged are based on defined specific time periods of days or weeks.

It would have been obvious to one of ordinary skill in the art at the time of the invention to recognize the consumption of chemicals in the baths may be monitored and replenished daily or weekly in order to ensure the appropriate chemical balance is maintained for proper electroplating of the desired materials.

Allowable Subject Matter

10. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

11. Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

12. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach nor fairly suggest displaying or issuing an alert message to an operator identifying the type of and number of reagents forecast to be exhausted and the need to be resupplied.

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Salpeter; Jerome; Vassiliou; Eustathios et al.; Carey; Glen A. et al.; Babson; Arthur L. et al.; Chomka; Chester et al.; Lewis; Scott C. et al.; Wang; Pei et al.; Tyberg, William et al.; Micklash, Kenneth J. II et al.; Devlin, William Jackson SR. et al.; Martens, Edward M. et al.; Baum, Marc M. et al.; Muraki; Ryoji et al.; Bartholic; David B. et al.; and Skeirik; Richard D. disclose process control and chemical delivery devices and methods.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian R. Gordon whose telephone number is 571-272-1258. The examiner can normally be reached on M-F, with 2nd and 4th F off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
